SUMMARY

Junior Software Engineer with hands-on experience building production-style web applications and collaborative software systems. Recently led the Social & Profiles feature for a live multiplayer platform at 42 Berlin, implementing authentication, user profiles, friends, and real-time chat. Experienced designing and building backend services, REST APIs, and full-stack web applications using Python, TypeScript, Next.js, PostgreSQL, Docker, and Git. Combined with 10+ years of business and accounting experience, I bring analytical thinking, ownership, and clear communication to engineering teams. Seeking to contribute to scalable and reliable software systems in a collaborative fintech environment.

TECHNICAL PROJECTS

Seasons of Floripa — Real-time multiplayer web game (42 Berlin Transcendence) - Live (https://seasonsoffloripa.com/) · GitHub

- Capstone project at 42 Berlin: designed, built, and deployed a live multiplayer web game inspired by Florianópolis, delivering a fully playable MVP.
- Feature Lead — Social & Profiles: designed and implemented the complete social features, including authentication, user profiles, friend management, and real-time chat within a TypeScript-based monorepo.
- Collaborated in a 4-person engineering team using GitHub for version control, pull requests, code reviews, issue tracking, and project management. Worked across frontend, backend, game mechanics, WebSocket communication, and DevOps to integrate features, resolve complex issues, and deliver a production-ready multiplayer web application.
- **Technologies: TypeScript ● Next.js ● PostgreSQL ● Supabase ● WebSockets ● Docker ● Git ● GitHub**

DrinkMeUp — Django cocktail recommender - Live (https://drinkmeup.onrender.com/) · GitHub

- Developed and deployed a full-stack Django web application that recommends cocktails based on user preferences and tracks user activity through authenticated profiles.
- Implemented secure user authentication, including signup, login, password reset/change, and Google OAuth using django-allauth.
- Designed the database schema with SQLite and deployed the application to PythonAnywhere.

Fuel Calculator — Android / Kotlin - GitHub

- Developed a multi-activity Android application that estimates trip fuel costs based on destination, distance, fuel consumption, and fuel price.
- Built using Kotlin, View Binding, Intent-based navigation, and Snackbar validation to deliver a responsive user experience.

Inventory Management System — Python + SQLite - GitHub

- Developed a Python inventory management application implementing full CRUD functionality with SQLite persistence.
- Designed structured database operations to ensure reliable create, read, update, and delete workflows.

EDUCATION

May 2025 - Present
Berlin (Germany)

42 BERLIN

Software Engineer (In Progress)
Low-level programming, algorithms, and problem-solving in C/C++.

Nov 2024 - Present
Remote

DEVSPACE

Android & Kotlin Mobile Development (In Progress)

Aug 2023 - Aug 2024
Berlin (Germany)

DCI - DIGITAL CAREER INSTITUTE

Python Backend Programming
Full-time program focused on Python, Django/Flask, SQL, APIs, and collaborative Git workflows.

Jul 2014 - Jul 2017

Sydney (Australia)

KAPLAN BUSINESS SCHOOL

Bachelor of Business, Major in Accounting

Mar 2008 - Oct 2012

Rio de Janeiro (Brazil)

UNIVERSIDADE FEDERAL RURAL DO RIO DE JANEIRO

Bachelor of Business Administration (Incomplete)

EXPERIENCE

July 2025 - Current

Musiversal Inc., Remote

FINANCIAL ADMINISTRATION AND CONTROLLING

- Maintain accurate financial records and process supplier and team payments.
- Support tax-related administration and coordinate with internal and external stakeholders.
- Collaborate effectively in a remote, product-focused environment while maintaining accurate documentation and administrative processes.

Oct 2021 - Feb 2023

Fritsche.berlin, Berlin (Germany)

OFFICE ADMINISTRATOR AND SALES ACCOUNT

- Owned end-to-end relocation processes and client communication.
- Configured Salesforce workflows, supported end users, and created operational reports.
- Delivered housing search and documentation support under tight timelines.

Sep 2020 - Jul 2021

Sitel, Lisbon (Portugal)

CUSTOMER SERVICE ADVISOR - SECRET ESCAPES

- Supported luxury vacation bookings; handled cases in Salesforce and payments via WorldPay.
- Resolved customer issues quickly and empathetically in a high-volume travel environment.

Jun 2016 - Jun 2018

Stay Global, Sydney (Australia)

ACCOUNTS ASSISTANT & SALES ACCOUNT

- Combined accounting operations with client sales in the education/travel sector.
- Handled reconciliations, budgeting, and customer follow-up.

Mar 2015 - Oct 2015

Nexus Property Sydney (Australia)

ACCOUNTS ASSISTANT & OFFICE MANAGER

- Reconciled 40+ transactions per week; processed rental payments and property inspections.

Earlier roles

HR DEVELOPMENT INTERN · PETROBRAS,
RIO DE JANEIRO · MAR 2011 – MAR 2012

MAINTENANCE PLANNING INTERN · VALE,
RIO DE JANEIRO · FEB 2010 – FEB 2011

SKILLS

Programming Languages	PYTHON, SQL, TYPESCRIPT, C, C++, KOTLIN
Frameworks & Libraries	DJANGO, FLASK, NEXT.JS, REST APIS
Tools	DOCKER, GIT, GITHUB, VS CODE, ANDROID STUDIO
Databases	POSTGRESQL, SQLITE, SUPABASE
Soft skills	COMMUNICATION, COLLABORATION, OWNERSHIP, PROBLEM SOLVING
Languages	NATIVE PORTUGUESE FLUENT ENGLISH
